

# 3-Sink Dishwashing Method

## Multi-Service Articles

Non-Chemical Method	Chemical Method
For a minimum of 45 seconds in clean water at a minimum temperature of 77°C (171°F)	At a minimum temperature of 24°C (75°F) for a minimum of 45 seconds in: <ul style="list-style-type: none"> <li>• Chlorine 100 ppm</li> <li>• Quaternary ammonium compound 200 ppm</li> <li>• Iodine 25 ppm</li> </ul>
Always use test strips to determine the concentration of the sanitizing solution and an accurate thermometer to determine the temperature of the sanitizing solution.	
If using a High Temperature Mechanical Dishwasher, ensure the sanitizing rinse is at least 82°C (180°F) for 10 seconds.
