COVID-19 Checklist for Summer Day Camps

This checklist is one of several resources intended to support children's day camps that are planning to operate while following current public health guidelines. All tools and resources have been designed with the goal of supporting safe, COVID-19 free experiences for children attending day camps and preventing the spread of the virus at the day camps.

For additional sector-specific guidance, visit the <u>Government of Ontario website</u> and refer to the provincial or federal professional association affiliated with your sector, if applicable. Visit the <u>WDGPH website</u> for ongoing updates and additional resources for day camp providers. Wellington-Dufferin-Guelph Public Health (WDGPH) is **unable** to review individual policies and protocols. These are not legal documents.

Highlights of Changes

- The total number of individuals in a cohort was revised from 10 to 15, not including staff (see Programming - Capacity and Size of Groups/Classes/ Cohorts)
- Specified that provincial testing guidance should inform asymptomatic testing (see Occupational Health and Safety - COVID-19 Testing)

Screening

Considerations	Details
Develop a Screening Process for Staff, Parents and Camp Participants	 □ Share details on the screening process with parents and staff in advance of the start of camp (if possible). □ Direct parents/guardians and staff to complete the following check each day before coming to the day camps (share Ontario's Self-Assessment as an example):

Drop Off and Pick Up

Considerations	Details
What does drop off look like?	 Drop-off of camp participants should happen outside the program setting unless it is determined that there is a need for the parent/guardian to enter the setting. Identify location and plan staffing requirements for screening at drop off.

Considerations	Details
	 □ Create signage or landmarks to make drop off and pick up location easy to identify. □ Drop-off procedures should support physical distancing and cohorting using strategies such as but not limited to: □ Avoiding group transportation □ Separate cohort entrances (if possible) □ Asking that one designated parent/guardian drop off camp participant □ Staggering entry or limiting the numbers of people in entry areas. □ Use COVID-19 screening signage as individuals enter the building or facility. □ Ensure that any required materials or equipment (e.g. hand sanitizer) are available at all entry points and throughout the building. □ Create a screening station that includes: □ Signage □ 2 metre distance visual markers □ One entrance/exit – if facility has multiple entrances, one entrance can be assigned per age group □ Hand sanitizer (70% alcohol) must be available for pre and post screening. As children may have an allergy, parent permission form is required □ Cleaning products to disinfect area between screenings □ Garbage receptacle(s) □ Follow screening procedures in 'Screening' section for child drop off.
What does pick up look like?	☐ Pick up of camp participants should happen outside
Triat dood plott up look line:	the program setting unless it is determined that there is a need for the parent/guardian to enter the setting. Identify location and plan staffing requirements for pick up.

Considerations	Details
	 Pick up procedures should support physical distancing and cohorting using strategies such as but not limited to: Avoiding group transportation
	 Separate cohort entrances (if possible) Asking that one designated parent/guardian drop off camp participant Staggering entry or limiting the numbers of people in entry areas.
	 Asking parents to wait while child is brought to them.

Programming

O and I and an	D. C. T.
Considerations	Details
Capacity and Size of Groups/Classes/ Cohorts	 Maximum overall capacity of camp is calculated as one camp participant per 4 square meters (4 m²), or 43 square feet (43 ft²) of space. The capacity should be calculated based on the smallest physical space that all participants will occupy but can still practice physical distancing and all other public health measures. Operate programs in consistent groups/classes/cohorts of no more than 15 camp participants. These groups stay together throughout the duration of the program (all day and all week). Cohorts cannot mix with other cohorts or be within in the same room/space at the same time, including pick-ups and drop-offs, mealtimes, playtime, outdoor activities, program spaces, tents, staff areas/rooms, etc.
	 Programs that utilize a room/space that is shared by cohorts or has other user groups (e.g., programs in museums, community centres, etc.) must ensure the room/space is cleaned and disinfected before and after using the space. A cleaning log must be posted and used to track cleaning.
Toys and Equipment	 Ensure all toys and equipment used at the summer day camps are made of materials that can be cleaned and disinfected (avoid plush toys, playdough) or are

	•
Considerations	Details
	single use and are disposed of at the end of the day (e.g., craft supplies). Minimizing the sharing and frequency of touching of objects, toys, equipment and surfaces, and other personal items. Increase the frequency (minimum twice a day) of cleaning and disinfecting objects, toys, equipment and frequently touched items.
	 Do not use water or sensory tables. Each cohort should have designated equipment (e.g., balls, loose equipment) or clean and disinfect equipment between cohort uses.
	 □ Discourage personal belongings being brought to camp. If items are brought to camp, personal items (e.g., backpack, clothing, towel, water bottles, food, etc.) should be labeled and kept in an area designated for the individual's cohort and should not be handled by individuals from other cohorts.
	□ Camp participants should bring their own sun
	protection, and this should not be shared. ☐ In shared outdoor space, cohorts must maintain a distance of at least 2 metres between groups and any other individuals outside of the cohort.
	If the playground, or play structure, is openly accessible to the public, including on school grounds, its use is not permitted at this time.
	If the playground, or play structure, is enclosed on private property (not a private residence/home) and accessible only to your day camp (not accessible to the public), its use is permitted if the specifications below are followed
	 Play structures can only be used by one cohort at a time and must be cleaned and disinfected before and after use by each cohort.
Washrooms	 Plans should be made to prevent mixing of cohorts in washrooms/ changerooms and to frequently clean and disinfect shared surfaces in washrooms/changerooms.
Activities	 Avoid singing activities indoors and ensure physical distancing for singing activities outdoors. Do not plan field trips and activities requiring group transportation.
	 Aquatic activities (e.g., pool, lake, beach, splash pad, wading pool etc.) must adhere to regulated

Considerations	Details
	requirements as well as to municipal guidance and restrictions at the time of activity. Do not plan activities with exposures to animals or pets.
Food and Eating	 Do not plan activities that involve camp participants in preparing or serving of food. Ensure camp participants and staff perform proper hand hygiene before and after eating. Ensure each camp participant has their own drink bottle that is labeled, kept with them during the day, and not shared. Fill water bottles rather than drink directly from the mouthpiece of water fountains. Ensure each camp participant has their own individual meal or snack with no common food or sharing. Reinforce "no food sharing" policies. Each participant and staff must have an individual water bottle labelled with their name. When filling up the water bottle, staff and participants need to use caution to not touch the lip of the bottle to the water fountain or sink. Physical distancing should be maintained while eating for camp participants and staff.
Travel	 Programs should not utilize any type of transportation, public or school buses to transport staff and children. Trips requiring group transportation should not be planned. If considering taking participants to parks, on walking trips or going to outdoor fields, physical distancing should be maintained.
Visitors	Do not allow any non-essential visitors, volunteers or special performers into programs. This consideration is to limit people in the facility and program area to control any potential exposure to children and staff.

Staffing Matters

Considerations	Details
There is an increased risk of more severe COVID-19 outcomes for: Older adults Those with other health complications Women that are pregnant	 Consider if the workplace has employees who may be more vulnerable to COVID-19 and may not be able to return (e.g., health issues, pregnant, older adults)? If so, plan for workplace accommodations. Ensure that employees are aware that they can contact Human Resources or camp leadership should they require any accommodations.
Are there enough staff to safely run the camp and in case of other staff being ill?	 Evaluate staffing requirements and consider recruiting additional staff to fill essential positions if necessary. Staff should only be working at one program site.
Is there a need to train new and existing staff on regular operations, as well as additional COVID-19 health and safety measures?	 Develop a training plan, based on public health and provincial guidelines.
Does the camp have policies or procedures to address job-protected emergency leave?	 Employees have the right to take <u>job-protected</u> <u>emergency leave</u> if they meet certain criteria. Consider planning for leaves of absence and a reduction in the number of staff members.

Occupational Health and Safety

Considerations	Details
Occupational health and safety considerations	 Employers must have written measures and procedures for staff safety, including for infection prevention and control. Camp directors and staff should stay updated on regulations and guidelines specific to the sector using provincial sources. Share and promote information with your employees on how to access mental health support.
Personal Protective Equipment (PPE)	□ Refer to PPE section of checklist.

Considerations	Details
Does the workplace have policies and procedures for employee self-monitoring or screening for symptoms?	 Develop policies for self-monitoring and daily staff screening of symptoms. Consider using the province's COVID-19 screening tool for the screening policy. The WDGPH guidance document for businesses also includes a template of a staff memo regarding self-monitoring.
Does the workplace have a policy and procedure for employees that are ill or become ill at work?	 Develop a policy that instructs employees to stay home if ill, even if only mild symptoms. If the camp does not already have a paid sick leave policy, consider developing one to prevent ill employees from coming to work. The WDGPH guidance document for Day Camps also includes information on what to do if an employee becomes ill or tests positive for COVID-19. Visit the WDGPH website for most current COVID-19 testing guidance.
COVID-19 Testing	 Symptomatic staff and camp participants should be referred for testing. Testing of asymptomatic persons should only be performed as per provincial testing guidance. Those who test negative for COVID-19 must be excluded from the program until 24 hours after symptom resolution. If a symptomatic person receives a negative result, a repeat test within 24-48 hours can be considered if clinical suspicion is high. Those who test positive for COVID-19 must be excluded from the program for 14 days after the onset of symptoms and clearance has been received from the local public health unit. Staff members and camp participants awaiting test results should be excluded from camp.
Is the camp director able to notify staff in the event that they may have been exposed to a COVID-19 positive individual in the workplace?	☐ The WDGPH guidance document for businesses includes a template of a memo regarding possible COVID-19 contacts.
Outbreaks	 Day camps must consider a single, symptomatic, laboratory confirmed case of COVID- 19 in a staff member or camp participant as a confirmed COVID-

Considerations	Details
	 19 outbreak in consultation with the local public health unit. Outbreaks should be declared in collaboration between the program and the local public health unit to ensure an outbreak number is provided. Any instances of occupationally acquired infection shall be reported to WSIB within 72 hours of receiving notification of illness.

Infection Prevention and Control

Considerations	Details
Considerations Hand Hygiene	 □ Camp participants and staff should be encouraged to wash their hands frequently with soap and warm water, for at least 20 seconds. Alcohol-based hand sanitizer can also be used if handwashing is not possible. □ Incorporate additional hand hygiene opportunities into the daily schedule or programming to assist camp participants: □ All persons must wash their hands at the start of the day prior to engaging in the play group and before leaving at the end of the day. □ Frequent hand washing must continue through out the day especially from one activity to another and after going to the washroom, before and after eating, etc. □ Gloves should be worn when it is anticipated the hands will come into contact with blood or body fluids and when providing care to a symptomatic child. □ Ensure hands are cleaned before putting on gloves and after removing gloves and that gloves are removed immediately after completing a task and prior to touching clean items and surfaces. □ 70% alcohol-based hand sanitizer is
	recommended and should be available, especially in areas without immediate access to hand washing sinks. Do not use alcohol free hand rub.

Considerations	Details
	 Ensure all hand washing sinks are unobstructed, possess hot and cold water, liquid soap, and disposable paper towel. Liquid soap containers cannot be "topped up" and reusable pumps must be cleaned and disinfected prior to refilling. Resource: Handwashing poster Signage for proper hand washing and hand sanitizer use should be posted near sinks and hand sanitizer stations.
Respiratory Etiquette (coughing and sneezing instructions)	 □ To prevent the spread of respiratory infections, proper respiratory etiquette needs to be taught to participants and regularly practiced by staff and participants. □ Post Respiratory etiquette posters at the entrance and in areas where they are likely to be seen, to remind staff and participants to practice proper respiratory etiquette. □ Respiratory etiquette includes: □ Covering your nose and mouth during coughing and sneezing with a tissue or sneezing or coughing into your sleeve or elbow □ Disposing of used tissues into the garbage immediately after use □ Practicing proper hand hygiene immediately after coughing or sneezing
Enhanced cleaning and disinfecting procedures	 Train staff on enhanced cleaning and disinfecting procedures. Post signage that remind all how to clean and disinfect properly. Increase the frequency of cleaning and disinfecting high-touch surfaces and follow public health guidelines. Additional cleaning resources are available here. Refer to the list of approved disinfectants and use these products to clean and disinfect properly.

Physical Distancing – Children, Parents and Staff

Considerations	Details
Physical distancing of at least 2 metres	 Encourage physical distancing of at least 2 metres between camp participants, parents/guardians and staff by: Spreading camp participants out into different areas; Spreading furniture, camp equipment, and activity stations out into different areas; Using visual cues (e.g., signs, posters, floor markings, etc.); Staggering or alternating lunchtime and outdoor playtime to reduce number of individuals in lunch area; Incorporating more individual activities or activities that encourage more
Can staff or meetings be held over the telephone or video-chat?	Avoid or limit in-person meetings and consider alternative approaches.
Are all workstations located at least two metres apart to allow for proper physical distancing between employees?	 Consider rearranging workstations or having employees work at every other workstation.
Is it possible to stagger shifts and break times to limit close contact between employees in common areas?	 Consider adjusting work schedules if possible and reducing the amount of seating in common areas. Also, limit the number of employees gathering in common areas and limit number in an elevator to allow for physical distancing. Tables, chairs, benches and lounge type areas need to be assessed and reconfigured to allow for a minimum distance of 2 meters to allow for physical distancing.
Does the camp have signage to direct parents and children and encourage physical distancing?	 Consider floor decals and <u>posters</u> to remind customers to keep a two-metre distance and direct the flow of traffic through aisles and queues.

Personal Protective Equipment (PPE)

Considerations	Details
Are there situations where physical distancing is not possible and non-medical face coverings (e.g., cloth masks) should be worn? Consider interactions between coworkers, and between staff and children and/or parents.	 Encourage physical distancing by following the guidelines above. If not possible, recommend or provide staff with non-medical face coverings. Encourage safe cough and sneeze etiquette when not wearing a face covering.
Do staff know how to properly put on, take off, and wash a cloth mask between uses?	 Provide staff with <u>posters</u> on <u>how to wear</u> and wash a cloth mask properly.
Will the employees require PPE?	☐ For information on specific PPE needs for the workplace setting, visit the Ontario workplace health and safety website.
