

Supplies and Equipment Used for Environmental Cleaning

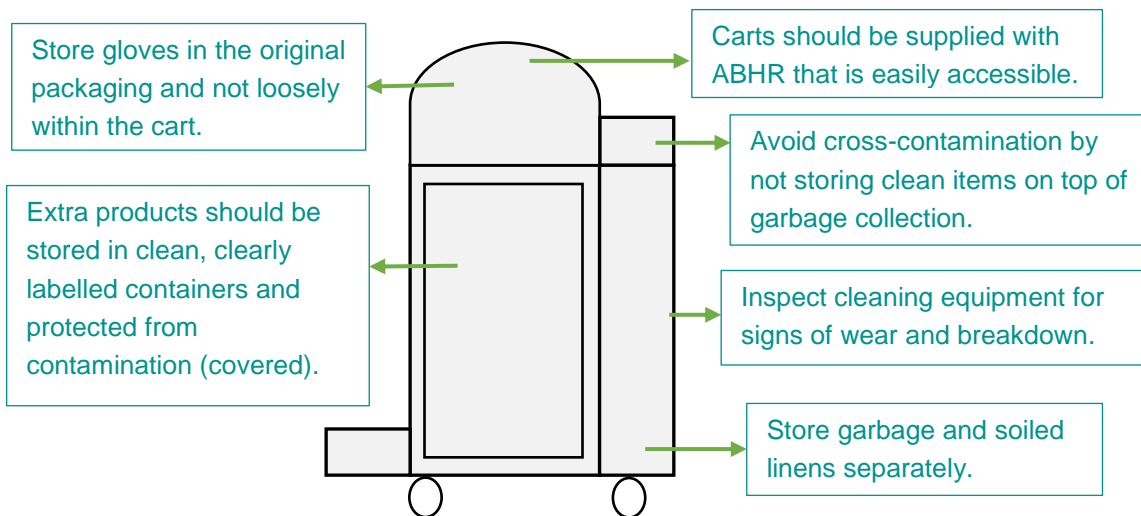

Cleaning Equipment

Equipment used for cleaning and disinfection should be clean, well maintained and in good repair.

Between uses equipment must be cleaned and dried (e.g., mops, buckets, and cloths). Do not store equipment wet.

If equipment has been used to clean a room on Additional Precautions, it must be cleaned and disinfected before being used in another room.

Cleaning Cart Organization

Cleaning Cart Do's and Don'ts

DO	DON'T
✓ Clean cart thoroughly at the end of each shift or day	✗ Do NOT store personal items, food, or beverages on or inside cart
✓ Keep cart locked and in a designated area when unattended, stored, and not in use	✗ Do NOT bring cart into resident or client rooms
✓ Ensure there are adequate supplies for duration of shift	✗ Do NOT combine clean and soiled items (e.g., used and clean cloths)
✓ Wear recommended PPE (e.g., eye protection) when there is a risk of splashes or sprays	✗ Do NOT use spray bottles (use squeeze bottles instead)
