COVID-19 IMS Response

Board of Health Meeting 8 July 2020

Christopher Beveridge Director, Health Protection Wellington-Dufferin-Guelph Public Health Christopher.Beveridge@wdgpublichealth.ca

IMS Overview

The Incident Management System (IMS):

- Provides standard framework for responding to events that require immediate reordering of priorities and deployment of human or material resources.
- Based on an understanding that there are certain management functions that must be carried out as part of an emergency response.

Timeline

Wednesday 8 July 2000

164 days working in IMS structure

27 January 2020

118 days from Provincial Emergency Declaration

o 13 March 2020

Pandemic Planning IMS Framework

Day 1-49

Contain and reduce spread

Day 50 - 164

Decrease morbidity and mortality.

Day ? - ?

Routine response to infectious diseases

Containment

Mitigation & Response

Recovery

IMS Organizational Structure

- Establishes a command and reporting clarity to ensure effective and coordinated response to all incidents.
- The command structure considers the number of individuals reporting to one person - "span of control."
- The number of reporting individuals is limited to a person's ability to effectively delegate and monitor tasks and performance

Basic IMS Structure

Initial IMS Structure Evolution

27 January 2020

Mid Winter IMS Structure Evolution

February 2020

Late Winter IMS Structure Evolution

March 2020

Spring IMS Structure Evolution

Spring 2020

Summer IMS Structure Evolution

Summer 2020

Summary

- All IMS functions support Operations
- Current IMS structure provide agency sustainability for long-term use
- IMS is a flexible and modular system to maximize span of control
- As response needs change IMS structure will adapt
