

To: Dr. Nicola Mercer, Medical Officer of Health, WDG Public Health

Re: Catch basin larvicide treatment

I am the owner /occupier of:

Street Address

City

Postal Code

To protect the public from the West Nile virus, the Medical Officer of Health for WDG Public Health has initiated a mosquito-control program to eliminate mosquitoes that carry and transmit the West Nile virus. Part of the program involves treating municipally-owned catch basins on private property.

Please describe where on your property any municipally-owned catch basins are located. A simple diagram may also be attached if required.

Please ensure there is clear and safe access to the catch basin(s).

Please check the boxes that apply:

Locked access. Please phone ahead.

Dog in yard. Please phone ahead.

By signing this waiver I am giving permission for employees and agents of WDG Public Health and the Canadian Centre for Mosquito Management Inc. to enter onto my property and to apply larvicide to **municipally-owned** catch basins that exist on my property.

*Signature of owner / occupier
(insert initials if filling out electronically)*

Date

Printed name of owner / occupier

Daytime telephone number

Please drop off your completed form or send it by email, fax, or mail to:
