

Safer Tattooing and Body Piercing

Where to go?

The following tattoo and body piercing shops are inspected **annually** by Wellington-Dufferin-Guelph Public Health, with additional inspections in response to complaints or to follow-up on infractions identified at the previous inspection. Please note that although the following premises are inspected by Public Health, this does **not** necessarily mean that these premises have a history of compliance with infection control best practices. To obtain a copy of a shop's most recent (or any other) inspection report you can:

- Ask the shop to show it to you.
- Contact Public Health to obtain a copy.
- Visit www.CheckBeforeYouChoose.ca to see a summary of the shop's inspection history.

If the shop you are considering for a tattoo or piercing is not on this list, it is **not** inspected. This means that Public Health Inspectors have not visited the premises to make sure that proper infection control procedures are being followed.

Getting a tattoo or body piercing at an uninspected shop puts you at risk of getting an infection. Visit your family doctor or school health nurse for information on how to be tested for hepatitis B, hepatitis C, and HIV.

The following list is accurate as of **May, 2018**. As of this date, there are **no inspected and approved home-based tattoo or piercing businesses in the city of Guelph**.
