

Food Safety Culture

Leader's Daily Commitment

As a leader, supervisor or manager, my actions impact food safety culture.

Today I will:

- Make sure everyone understands and proactively addresses food safety risks.
- Fix issues quickly and make sure this facility is equipped and maintained to enable proper food
- Train and empower all employees to uphold food safety standards.
- Hold everyone accountable for food safety.

- Motivate and support employees to address food safety, celebrating good practices when I see it.
- Foster clear, two-way communication about food safety practices and expectations.
- Prioritize food safety on par with other business objectives.

Food safety culture is a powerful force. A weak food safety culture will result in serious consequences. A strong food safety culture will empower employees to serve safe food each and every day.
