

Initial Outbreak Steps

1

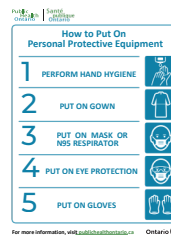

Identify and Isolate Symptomatic Residents

- Individuals with one symptom should be isolated if that symptom is not normal for them

2

Post Signage

- Droplet/Contact sign and PPE donning on front of door
- PPE doffing sign inside the room

3

Place PPE at Point of Care

- Gloves, gown, eye protection, medical mask, and N95 respirators

4

Place Cleaning and Disinfecting Wipes and ABHR at Point of Care

- Check expiry dates

5

Test Symptomatic Individuals

- Individuals with one symptom should be tested
- Use a PCR test

6

Continue Additional Precautions until notified by the IPAC lead
