You've been identified as a close contact of someone who has tested positive for COVID-19 or someone with COVID-19 symptoms. Now what?

Yes

ediately for at least 5

- Self-isolate immediately for at least 5 days (if fully vaccinated or under 12)** or 10 days (if **not** fully vaccinated or immunocompromised) after symptom onset and until you have no fever and other symptoms are improving for 24 hours (or 48 hours for gastrointestinal symptoms).
- Get tested if eligible and follow the guidance for cases.

- <u>Self-monitor</u> for symptoms for 10 days after your last exposure.**
- Report your exposure to your employer and follow any work restrictions.
- If you develop symptoms, get tested if eligible and <u>self-</u> <u>isolate</u> immediately.

- If you meet any of the below criteria you **do not** need to self-isolate**:
 - You have previously tested positive for COVID-19 in the last 90 days
 - You are 18+ and have had a first booster dose
 - You are under 18 years old and are fully vaccinated
- If you **do not** meet the above criteria you must <u>self-isolate</u> while the positive/symptomatic person is isolating.
- If you develop symptoms, continue/start to self-isolate and get tested if you are eligible. Follow the guidance for cases.
- If anyone else in your household develops symptoms, if you are isolating and still have no symptoms then you should extend your self-isolation until the newly symptomatic person has finished isolating.

Wear a well-fitted mask in public (including schools and childcare, unless under 2 years of age), physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should **NOT visit or attend work in any highest risk settings and not visit individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days after your last exposure.
