

Tetanus-Containing Vaccines: Catch-up schedule for children starting immunization AFTER age 1 and BEFORE age 7

When this document should be used:

- Children under 7 starting immunizations
- Children under 7 with incomplete immunizations/schedules
- Children under 7 with missing or no record of previous immunizations

*There are nuances here if they have had a few doses, they may not need the whole schedule

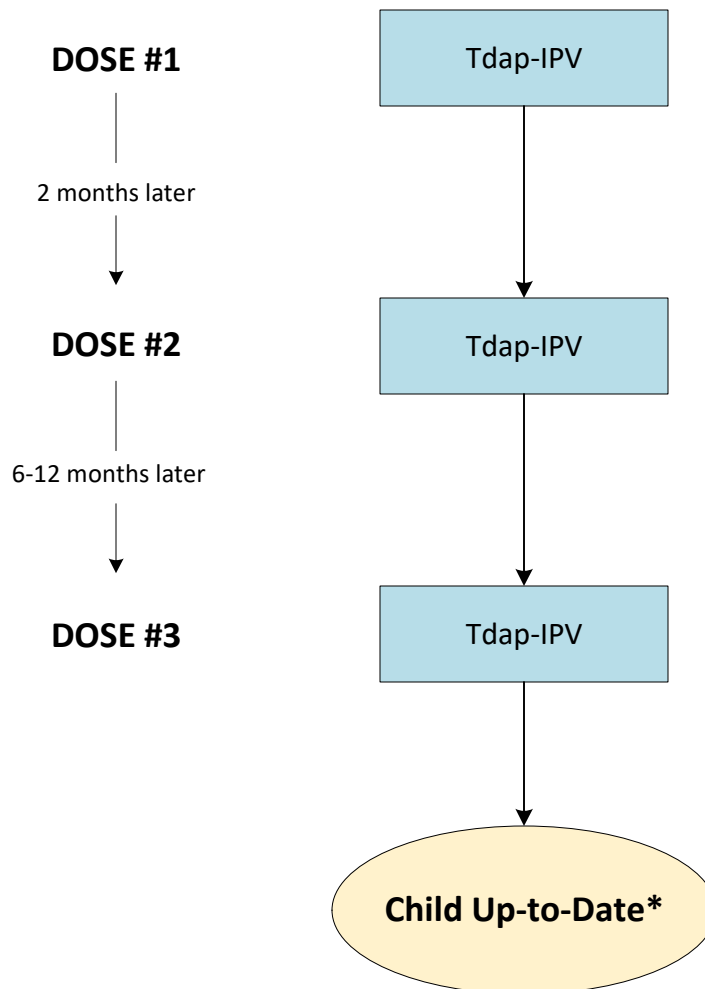

*Should be followed by adolescent and adult boosters every 10 years, using Tdap or Td as outlined in the Publicly Funded Immunization Schedule. Additionally, a Tdap booster should be given in each pregnancy regardless of the interval since the last tetanus-containing vaccine.

Tetanus-Containing Vaccines:

Catch-up schedule for children starting immunization AFTER age 7

When this document should be used:

- Children 7 or over starting immunizations
- Children 7 or over with incomplete immunizations/schedules
- Children 7 or over with missing or no record of previous immunizations

**Should be followed by adolescent and adult boosters every 10 years, using Tdap or Td as outlined in the Publicly Funded Immunization Schedule. Additionally, a Tdap booster should be given in each pregnancy regardless of the interval since the last tetanus-containing vaccine.*
